

It is my understanding that the FCC wants to overturn the NJ "Do Not Call" registry. This is a very stupid idea. NJ is protecting my "Right of Privacy" from telemarketers. I signed up for the NJ, Federal and Direct Marketing Association list. I want less intrusion, not more. I want spam to stop and I don't want junk phone calls either. The FCC is mandated to protect US communications, not protect those who want to violate the rights of citizens from undue intrusions. The FCC should NOT in anyway fight or overturn the NJ "Do Not Call" list.

Do the "RIGHT" thing and leave NJ's "Do Not Call" system alone !
